Velocity

Average velocity = (Total Story Points Completed) / (Total Duration in Days)

Total: 77 points over 24 days → **Velocity = 3.2 points/day**

Burndown Chart:

A **Burndown Chart** represents the remaining work (story points) against time for each sprint in the Garage Management System project.It helps visualize sprint progress, track task completion, and predict if the team is on schedule.The Garage Management System showed a consistent velocity across sprints, with minor variations in Sprint-2 due to integration testing. By Sprint-4, the project achieved full completion of planned story points, meeting the release targets successfully.
